

# Radiation Medicine and Protection

Volume 5, Issue 3, September 2024 Quarterly

## Contents

### Reviews

- 145 Biophoton signaling in mediation of cell-to-cell communication and radiation-induced bystander effects**  
Jian Tong
- 161 Tacrolimus may play a role in dermatitis and radiation-induced skin injury through cellular senescence**  
Jie Chen, Ling Gao
- 165 Role of bioinformatics databases and tools in radiation biology**  
Yizhe Gao, Qingjie Liu

### Original articles

- 170 A population level study on smoking and radon induced adenocarcinoma and small-cell carcinoma among males and females in Canada**  
Jing Chen
- 178 Regulator of G protein signaling 20 contributes to radioresistance of non-small cell lung cancer cells by suppressing pyroptosis**  
Jialing Zhang, Zhaoyan Jiang, Xinglong Liu, Xiaoya Jin, Yan Pan, Yang Bai, Jianghong Zhang, Chunlin Shao
- 185 scRNA-seq transcriptomic profiling of irradiated mouse skin reveals altered cell types, pathways, and cell-cell interactions**  
Zhisen Zhang, Yinyin Shu, Shuangshuang Lu, Kai Kang, Mintao Ji, Peng Zhang, Lei Chang
- 194 Knockdown of the nucleoporin Nup50 protects cells against ionizing radiation through enhancing DNA-PKcs-mediated DNA damage repair**  
Zhijie Wan, Jingwen Gu, Songyun Zhao, Hang Jia, Tingting Liu, Yuanyuan Chen, Yanyong Yang
- 201 Study on healthcare level and its relationship with medical radiation in China**  
Shiyue Cui, Yinping Su, Hui Xu, Quanfu Sun
- 207 Assessment of radiotherapy and diagnosis resources allocation in Shanghai, China**  
Fanqiaochu Yang, Cuihong Yuan, Shunqi Lu, Hong Xiao, Linfeng Gao
